

Connecticut Renewable Energy

Assessment & Assistance Project

Six Easy Steps to Add Renewable Energy to Your Farm or Rural Small Business

01

Visit ctfarmenergy.org/CTREAA, call (800) 732-1399 or use the QR code.

JOIN

02

Send in your electricity bills from the past twelve months to document your electricity consumption patterns and define your potential energy cost savings.

ENERGY SAVINGS

03

CTREAA energy analysts will offer advice about which type of renewable energy system is right for you, assist you in selecting an appropriate project, and design your renewable energy system for you.

RES SYSTEM DESIGN

04

Contact renewable energy vendors and get quotes for the system designed for you in Step 3. This ensures you get "apples to apples" quotes you can directly compare to find the best price.

GET VENDOR QUOTES

05

Our energy analysts develop your Renewable Energy System Technical Report, a required part of your Rural Development financial assistance application package that fully documents the energy generation, vendor quote suitability, and financial performance of your project.

RES TECH REPORT

06

Apply for financial incentives! CT RC&D's Farm Energy Program will help you prepare and submit a REAP grant and/or loan application for your project to USDA Rural Development, as well as provide information on other financial assistance available.

REAP GRANT
